H. EDUCATION

- Dr. Mark Fox
Assistant Superintendent
Planning, Evaluation, and Information Services
Wyoming Department of Education
Cheyenne, Wyoming
(307) 777-7621
Contacted 25 October 1976

School Facility Inventory, 1975-1976, Wyoming Department of Education (published for the first time this year.

The inventory is based on a questionnaire sent to all school districts. The information requested was: number of buildings in use and vacant; number of classrooms in use and vacant; enrollment; projected number of buildings and classrooms needed in three years.

In addition, district supervisors were asked to rate facilities in terms of their present conditions, and to approximate the number and type of facilities that will be needed.

Dr. Fox warned that since the inventory is based on individual completion of the questionnaire, requiring individual value judgements, it may have a reliability problem. Projected needs especially are subject to individual interpretation, and therefore may not be complete accurate or comparable.

Statistic Summary III, Wyoming Department of Education. Contains fiscal data on each school district, expenditures, bonded indebtedness, enrollment, and operational costs.

Gilmore and Duff, A Growth Management Cast Study: Sweetwater County, Wyoming, Denver Research Institute, 1975.

The future of the mining and construction boom in Rock Springs-Green River was analyzed and projections were made. Problems such as reduced industrial productivity, degraded quality of life, and threatened local government solvency were categorized and suggestions were made for new institutions and legislation.

Gilmore, Moore, Hammond and Coddington, Analysis of Financing Problems in Coal and Oil Shale Boom Towns, Washington: Federal Administration, June 1976.

The four case studies prepared for this study include: Meeker, Colorado; Sheridan, Wyoming, Sweetwater County, Wyoming; and Emery County, Utah. The external financial assistance needed by these communities as a result of new coal or oil shale development was analyzed. Public expenditures and revenues were projected.

Gilmore, Milliken, Moore, Hammond, and Basinger, Socioeconomic Analysis Appropriate for an Environmental Impact Statement for a Uranium Mine-Mill Complex at Bear Creek, Wyoming, in progress, 1976.

Recent Denver Research Institute research on socioeconomic impacts and growth management will be applied to the preparation of Environmental Impact Statements and the mitigation of the negative impacts of a specific development proposal -- a uranium mill-mine operation at Bear Creek, Wyoming. Particular attention will be paid to the Prince George's County vs. Holloway decision, and other Environmental Impact Statement criticisms.
